

Apex Pro FH TTX# Change

Adding TTX:

EXAMPLE: Changing the TTX number from old TTX 60123 to new TTX 60456

1. Admit the old TTX number 60123 and you will see a wave form for about 3-6 seconds then it will go away.
2. Then discharge that TTX number.
3. Then admit the new TTX number 60456 and it is between 10 seconds and 2 minute and it will register it on the access point of the server.
4. Give us a call with any questions
