Entering and Leaving Configuration Mode

Switching between monitoring and Configuration Mode does not affect the active settings. You can even continue to monitor patients while in Configuration Mode. The password for Configuration Mode is given in the monitor's service documentation.

To enter Configuration Mode:

1   In the **Main Setup** menu, select **Operating Modes**.

2   Select **Config** and enter the password.

The monitor displays **Config** at the right hand side of the status line and in the center of the Screen while you are in Configuration Mode.

Before you leave Configuration Mode, always be sure to save any changes you made. You must save changes made to each Settings Block and to each Profile, individually, or by selecting **Save All**. As it may be difficult to remember whether the settings you changed belong to a Monitor Settings block or

Make needed changes (example: alarm limits, location of waveform, parameter,......)

To start configuring your monitor, access **Profiles** by selecting either:

*   the **Profiles** screen element from the monitor's Info Line

*   the **Profiles** SmartKey

*   the **Profiles** pop-up key in the **Patient Demographics** menu

*   **Profiles** from the **Main Setup** menu

The configuration pop-up keys will appear to let you carry out configuration tasks.

Saving Changes to profile

Profiles	✕
Profile:	ICU B
Patient Category:	Adult
Paced:	Yes
Display:	ScreenICU
Measmt. Settings:	Measmt. B
Monitor Settings:	Monitor B

Each Profile is a named combination of:

- one Screen
- one monitor settings block
- one measurement setting block

Every Profile also has a set patient category and paced status.

Make sure you are selected on the profile you made changes too.
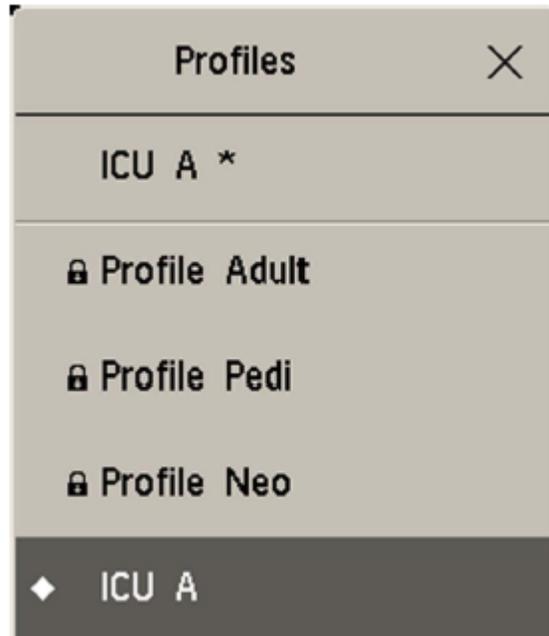

Select "Display" then hit Store ↑

Select "Measmt. Settings" then hit Store ↑

Select "Monitor Settings" then hit Store ↑

If "Store" is grayed out, check on the right side of the profile for a LOCK symbol as seen bellow.

This mean your profile is LOCKED and cannot be modified. ONLY WAY to Unlock a profile is with the Support Tool.

Quick Fix:

Make a "New" profile off the one locked profile. Then you will be able to save.
